

Riverland fruit fly outbreak fruit movement rules

The Riverland Pest Free Area (PFA) is recognised internationally for growing delicious high-quality fruit and vegetables. To help protect our local fruit and vegetable growers, packers and retailers, there are restrictions on bringing certain fresh produce into the Riverland.

what you can do

Prepare your lunchbox

These items do not attract fruit fly and have no restrictions. You can buy them anywhere in South Australia and bring them into the Riverland PFA.

Source from our canteen

Buy fruit from the canteen that you can't bring to school.

Buy from a local shop

Buy any fresh fruit and vegetables from shops inside the Riverland PFA.

All fruit & vegetables are okay to bring to school if it is:

- **Frozen** – grapes, berries or mango for a refreshing snack
- **Cooked, baked or stewed** – add some yoghurt on the side (remember to add an ice pack)
- **Canned** in natural juice or water
- **Dried** – not for everyday and keep these serves small (no more than 30g)
- **Grated (not sliced)** – in a sandwich, wrap or salad
- **Pureed (not mashed)** – by itself or in yoghurt

Fruit fly outbreaks

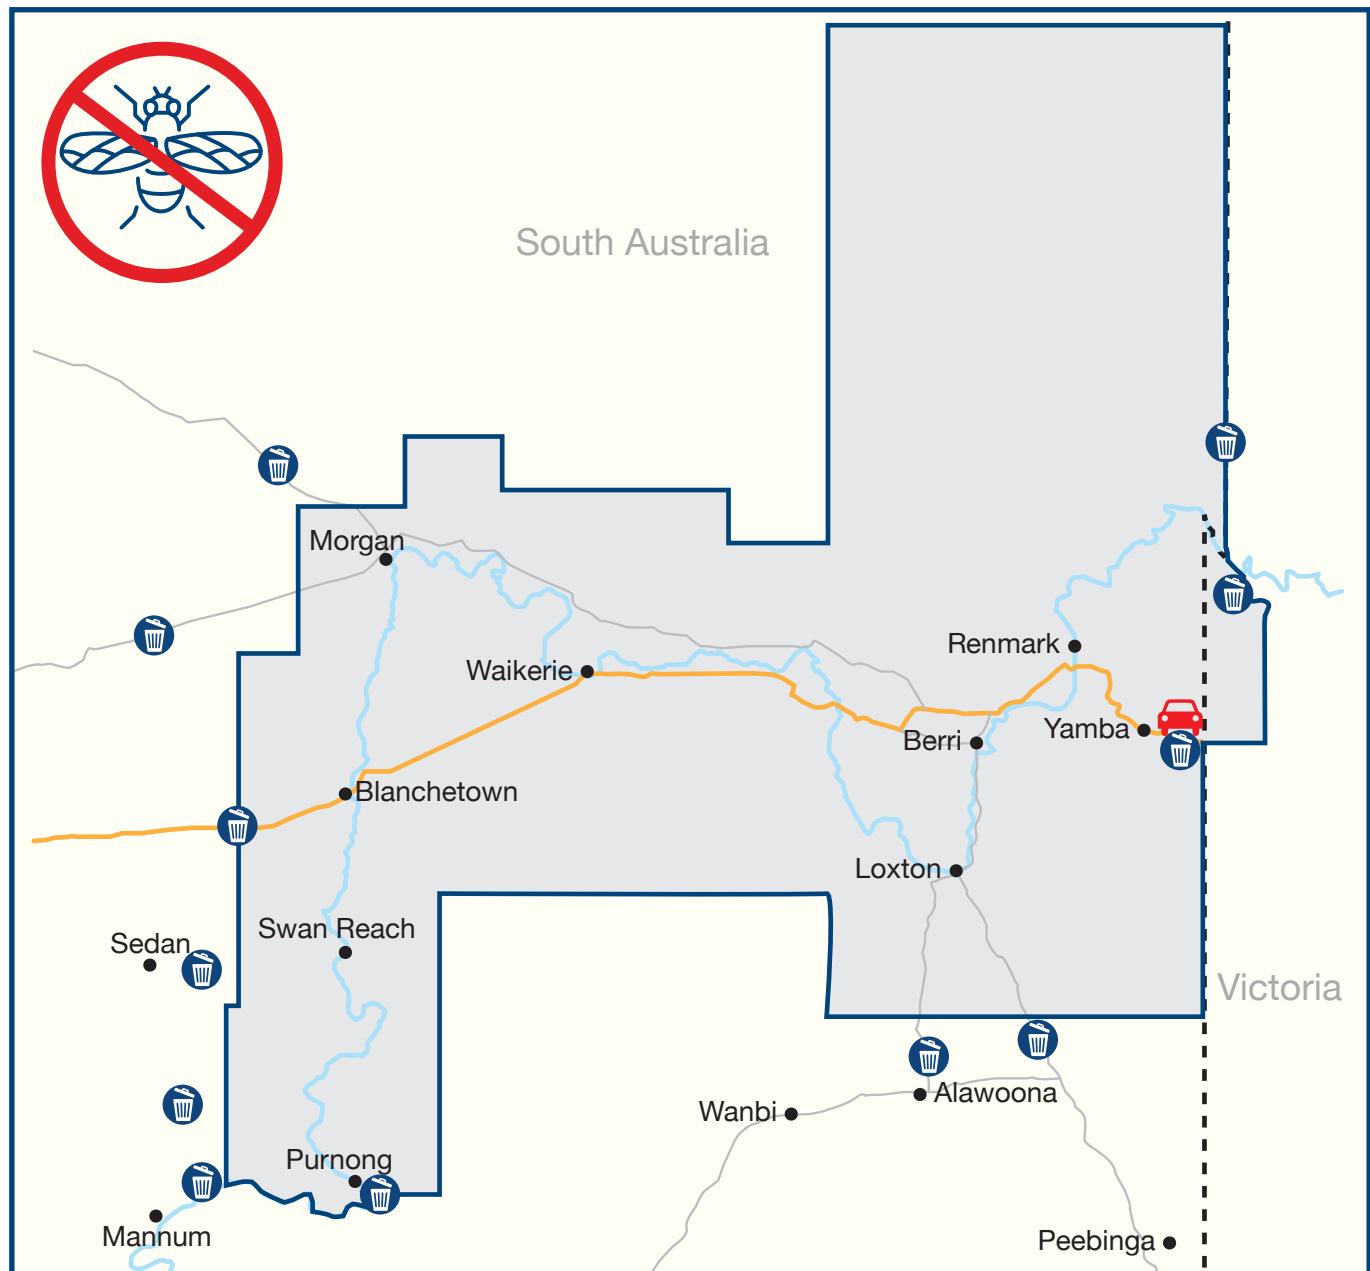

Further fruit movement restrictions may apply if a fruit fly outbreak is declared.

1. Search the fruit fly map to check if our school or your home is in a fruit fly outbreak area.
2. Understand the restrictions in place by visiting fruitfly.sa.gov.au
